

Spokane Cooling Access & Heat Risk Screening

Relative score for heat risk, social vulnerability, vehicle access, and cooling-resource distance | not an official designation | 34 scored cooling resources | 235 mapped resources

Spokane Urban Core Detail

County Context

Dashed box shows detail extent

Key Finding

This screening flags places where heat exposure and cooling-access gaps stack together. The highest-ranked tracts are mostly outer urban or edge areas, not just the downtown core.

Top Priority Tracts

Countywide rank; numbers match the map and inset.

	Score factors	Total mi
1 Tract 140.01	3/3/3/3	12 7.2
2 Tract 136	3/3/3/3	12 3.7
3 Tract 112.03	3/3/3/3	12 3.1
4 Tract 50	3/3/3/3	12 2.7

Score

Score factors are heat, social vulnerability, vehicle-access barrier, and cooling access; each is scored 0-3.

Caution

Distances use tract internal points. Classes are relative. Facility status, hours, capacity, and transit travel time are not modeled.

Concern class

- Low (35)
- Medium (67)
- High (28)
