

Spokane County Cooling Access & Heat Risk Screening

130 Census tracts | 34 cooling centers/spaces used for access scoring | 235 total mapped cooling resources

Urban Core Inset

Screening score
Heat-wave risk + social vulnerability + no-vehicle households + distance to nearest cooling center/space.

Access method
Distance uses Census tract internal points and Gonzaga/SRHD cooling centers and spaces. Pools, splash pads, drinking fountains, and parks are mapped as supplemental context only.

Interpretation
Classes are relative tertiles within Spokane County. This is not an official heat-response map.
