

Spokane Cooling Access & Heat Risk Screening

Relative score for heat risk, social vulnerability, vehicle access, and cooling-resource distance | not an official designation | 34 scored cooling resources | 235 mapped resources

Spokane Urban Core Detail

Concern class

- Low (35)
- Medium (67)
- High (28)

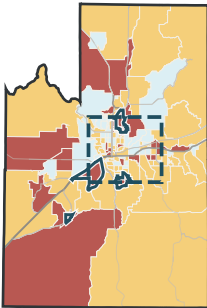

Scored cooling resources

- Libraries
- Community/rec
- Senior/community
- Other spaces

Context

- Supplemental resources
- Major roads
- Top priority tract

County Context

Dashed box shows detail extent

Key Finding

Use the ranked tracts to target cooling outreach, pop-up cooling options, and site verification where heat exposure and access gaps stack together.

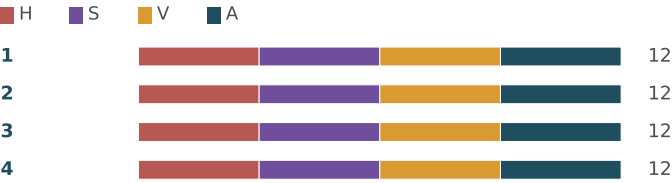

Top Priority Tracts

Countywide rank; detail map labels visible top tracts.

		H	S	V	A	Total mi
1	Tract 140.01	3	3	3	3	12 7.2
2	Tract 136	3	3	3	3	12 3.7
3	Tract 112.03	3	3	3	3	12 3.1
4	Tract 50	3	3	3	3	12 2.7

Why They Rank High

All four reach maximum factor scores; mileage shows access severity.

H: heat | S: social vulnerability | V: vehicle-access barrier | A: cooling access. Each factor is scored 0-3.

Caution

Distances use tract internal points. Facility status, hours, capacity, and transit travel time are not modeled.
